

Frequency Flow

The Wave of the Future!

P. O. Box 313 · Franklin, Tennessee 37065-0313 · 888-750-8822 · mike@mikeflynt.com

Dear Frequency Flow Product User:

We are asked repeatedly how the Frequency Flow products are able to protect the body from the harmful effects of EMF/WiFi and other “manmade” frequencies that invade our individual space, on a regular, 24/7 basis? First, I want to make something abundantly clear, you cannot block those manmade frequencies that are inherently bad for our body’s cells. If you lived in a Faraday cage, then and only then would you be able to block those bad frequencies. So, when we realized that blocking the bad frequencies was not an option, we focused on providing the body with God given frequencies that the body needed to remain stable (even to perform above the body’s baseline frequency) even when surrounded by negative manmade frequencies. How do we do that? The following is my answer to that question.

The Law of Resonance states that in a resonance field, any frequencies that do not conform to that field cannot form a resonance and so cannot exist within that field. In a harmonic resonance field (which the Frequency Flow Products create) any artificial frequencies (EMF/WiFi) cannot have an effect. It does not matter from where those artificial frequencies originate. The Frequency Flow products, worn by the consumer, harmonize the body’s cells by transmitting a harmonic resonance field of information to the body’s cells (much like a tuning fork creates a resonance field) and said resonance field enables the body to stay free from the negative effects of artificial frequencies. Further testing by FDA cleared medical equipment has shown that the resonance field created by Frequency Flow products not only protects the body’s cells from harmful manmade frequencies, but they also enhance the body’s capacity for strength and endurance.

Everyone who wears our Frequency Flow products has their own personal experience. Even though you may not feel a difference wearing our products, you can be assured that they are working to provide your body’s cells with the protection they need from the harmful effects of manmade frequencies.

Kindest regards,

Michael Flynt, CEO/President
